INDIVIDUAL BLASTROOMS FOR YOUR PROCESS

No matter if you want to carry out manual cleaning, roughening, deburring or scale removal of steel structures, wind power plant components or rail vehicles – we plan, design, manufacture and install a blastroom for you that fully meets your requirements.

Blastrooms with automatic function

Automatic blasting functions in blastrooms can be realised e.g. by our **media blast robot ReCo-Blaster®** or by linear axes with movable blast nozzles.

Different types of blast media reclaim systems available

- > full-floor media reclaim system with mechanical lamella-type conveyor floor
- > pneumatic full-floor reclaim system with waffle floor
- > partial reclaim system with screw conveyors
- > partial reclaim system with conveyor belts
- > partial reclaim system with vibratory troughs
- > partial reclaim system with sweep-in hoppers
- > combinations of the mentioned systems

Numerous options for the layout of blastrooms:

- > roof slot for charging by means of overhead crane
- > lifting platforms for comfortable and safe working
- > magnetic separating roller for the use of a second or more types of blast media
- > heavy-duty gratings for trafficability by e.g. forklift truck
- > air recirculation mode for energy saving
- > top-hung folding doors or roll-up doors
- > many more...
